

## Redrock Camps Streamlines Processes, Gains Clear Insights into Operations

"With SAP Business One, we now have the information we need, at our fingertips, to accelerate decision making, manage perishable goods, and create stronger relationships with our customers. We're more nimble now."

Troy Ferguson, President

We were impressed with Zantek's knowledge and commitment to getting us to a world-class solution. We look forward to continuing this relationship.

Susan Korba, Consultant

### Redrock Camps Snapshot

- Location: Calgary, AB with warehouses in Grande Prairie and Edmonton
- Products: Workforce hospitality services and modular workcamp solutions
- Customers: Oil & gas, mining, construction
- SAP Business One users: 30
- Produmex Advanced Warehouse Management users: 12

### Improved inventory management lowers costs and increases productivity

Redrock Camps needed to better manage its inventory, including food items, for the camps it operates in remote areas across western Canada. Zantek worked closely with Redrock to tailor a scalable business management solution using SAP® Business One.

#### Objectives

- Automate warehouse management, including receiving, storage, and shipping
- Automate administrative functions, from purchase orders to invoices
- Share data across the company to improve customer relationship management and service
- Easily access complete and accurate data for profitability analysis, by camp

#### Why SAP Business One

- A complete system with the functionality to satisfy all business needs
- Scalable solution to support a phased implementation and future growth
- World-class application designed for small and midsize businesses

#### Why Zantek

- In-depth experience in inventory management solutions
- Proven track record in understanding business needs and tailoring ERP software
- Full project management expertise, including hardware fulfilment and IT services

#### Benefits

- Streamlined back-office and customer-facing processes
- Lower costs and increased productivity through automation of receiving and shipping with bar code coding and scanners
- Better purchasing decisions and vendor management
- A more strategic management view through centralized access to accurate business data
