

SAP Business One for mobile warehouse management

The advantages at a glance:

Paperless warehousing

Reduce error rate

Flexibility saves time

Reduction of downtime

Inventory with scanners

Faster picking

Full integration with SAP Business One

SAP Certified Solution

Target group:

For companies with a need to optimize costs, be flexible and have an accurate view of inventory, variatec has developed BX Mobile Warehouse.

Runs with:

SAP Business One combined with variatec BX Warehouse.

The solution:

This mobile solution is an extension to variatec BX Warehouse. With a mobile device all operations can be captured within seconds (e.g. receiving, picking, intercalation, rearranging, inventory, volume, pitch information). Data gets booked or managed online.

Your benefits:

All system-generated movements are available within seconds on a mobile device. It optimizes the internal travel time of warehouse employees and it reduces error rates. Inventory with mobile devices is faster and safer. It reduces inventory and downtime and increases quality and customer satisfaction.

Implementation:

variatec BX Mobile Warehouse Management is easy to install with minimal training needed.
